The Student Is ...

... the most important person on campus. Without the students, there would be no reason for Florida Tech to exist. Handle all students like VIPs—Very Important Panthers—for that is what they are.

... never just a number, but a flesh-and-blood human being with needs, emotions and ambitions like our own. Always remember the "Human Touch."

... not to be thought of as someone that another person in another office can take care of later. It is your responsibility to take care of each student, now.

... not an interruption of our work, but the purpose of it. Take the time to give students your full attention.

... a young adult, yes, but also someone's child. Consider that behind every student is a family and ask yourself how you'd want your child to be treated.

... a future alumnus and, as such, the future of Florida Tech. Help students to love the university today; they will be its stewards and champions tomorrow.
