Memo:

This memo addresses the justification for the addition of a prerequisite for the CIS 4026 (Introduction to Internet Applications) class. There currently is no pre-requisite required for this class. The class is focused around creating applications for the online environment and thus requires a substantial knowledge of programming. With this being said, CIS 3318 (Electronic Commerce) makes a suitable pre-requisite for two reasons. First, CIS 3318 requires either of the two advanced programming classes as a pre-requisite. This ensures that the student has been properly prepared for the rigorous analytical and problem solving requirements of CIS 4026. Second, CIS 3318 will introduce the student to the concepts and procedures unique to the online environment including server tools, e-payment, security, and regulatory issues.
