

Greetings,

Our next UGCC meeting is scheduled for 8:00AM Friday, October 24, in the 2nd floor conference room of the Olin Life Sciences Building. The agenda items I have are as follows:

1. Change "Interdisciplinary Science" program to "Interdisciplinary Science and Technology". (Documentation was handed out at the end of the last meeting.)
2. Add new course CHE 1091 to the curriculum. This is the same course as PHY 1091, approved at the last meeting. (See the attached CHE1091.PDF; the signed form will be available at the meeting.)
3. Add new course CHM 1091 to the curriculum. This is the same course as PHY 1091, approved at the last meeting. (See the attached CHM1091.PDF.)
4. Revision of AP examination credit for computer science. (See email from Bill Shoaff below.)
5. Change of graduation requirements in Space Sciences. (See the attached SpaceSciences.PDF.)
6. Change of graduation requirements in Physics. (See the attached Physics.PDF.)
7. Change of graduation requirements in Astronomy/Astrophysics. (See the attached Astronomy.PDF.)
8. Review of 1998 UGCC recommendation regarding humanities core requirements for transfer students. (See the attached Transfer1998.PDF.)
9. COM 1102 prerequisite for HUM 2051, 2052. (See email from Cookie Young below.)
10. HUM 2051, 2052 prerequisites for other humanities courses.
11. Broadening humanities core requirements for all students.
12. Free Elective credit for COM 1100. (See email from Tom Bowman below.)

Dr. Enstice would like to formalize the process of changing course prerequisites with the following procedure. A memo to Dr. Enstice through the Chair of the UGCC should request the change in prerequisite including a justification for the change. If the change would have a major impact on other departments then the change would be discussed by the UGCC.
