

**To:** University Curriculum Committee  
**Through:** Ed Kalajain, Associate Dean, College of Engineering  
Tim Hollingsworth, Dean, College of Business  
**Date:** March 25, 2005  
**From:** William Shoaff  
**Subject:** Transfer of Bachelor of Science in Information Systems (7074)

The Academic Program Review conducted by the department at the behest of the Provost led to a recommendation to phase out the Bachelor's of Science degree program in Information Systems (7074) offered by the Department of Computer Sciences. More specifically, the recommendation was to merge this degree with the Bachelor of Science degree in Information Systems in Business (7567) offered by the College of Business.

This recommendation, and supporting data from the Academic Program Review, has been considered by the deans of both colleges and the Office of the Provost. The recommendation has been approved by each entity.

The University Curriculum Committee recommends, or not, new programs. Therefore, it should recommend, or not, when programs are altered as described above. This memo is to bring this matter to the attention of the University Curriculum Committee for discussion and recommendation.

Students currently in the 7074 program will continue to be served by the Department of Computer Sciences, unless and until they change to the 7567 major code. Any and all new students who enter the 7074 program in Fall 2005 will be likewise served. Afterwards, we request that students interested in Information Systems be directed to the College of Business program.
