Current status

Administrative & Academic Support Assessment Committee

The purposes of the committee are to review the mission statement and review and update the short range and long range plans of the institution (i.e. financial, marketing, development, and campus master plans, and the SACS quality enhancement plan (QEP)). Initially we will focus on major initiatives outlined in the currently approved Strategic Plan for the university, which include the university mission, undergraduate and graduate education plans, student life, undergraduate enrollment, technology support, stewardship of resources (facilities), funding, research, and communication and teamwork.

Another purpose will be to oversee the assessment of goals and objectives of individual administrative and academic support units.
