

Florida Institute of Technology Student Outcomes Data – Class of 2015

Career Management Services strives to assist students in achieving their career goals during and after graduation. The information provided below provides data regarding the post-graduation plans of students who graduated in December 2014 and May 2015.

Data was collected 6 months following the student’s graduation. It is our hope that this information assists you in choosing the right program and school for your college education and future career endeavors.

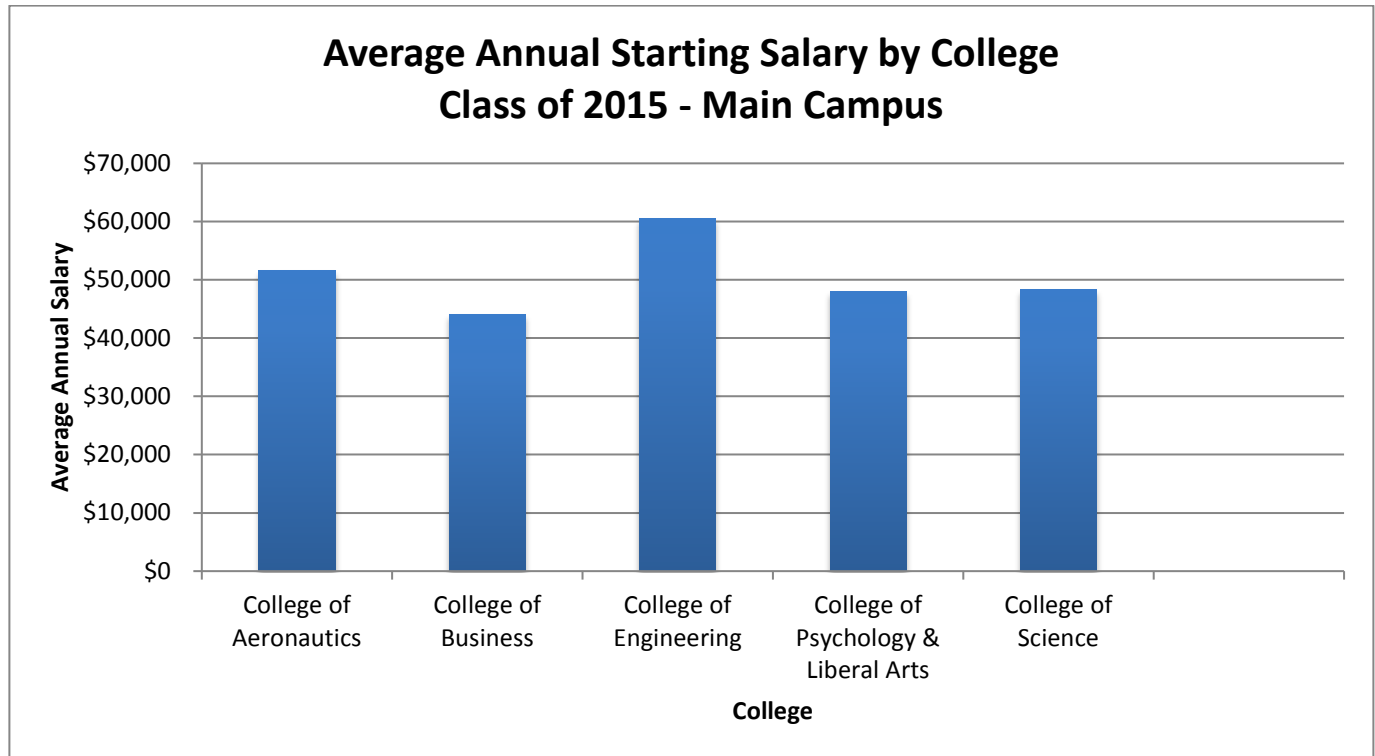

The majority of Florida Tech students enter the workforce after graduation, however, many pursue further education through graduate studies.

Florida Tech Student Outcomes - Main Campus
