**Safety Information**

Always seek the advice of your doctor before beginning an exercise program.

Visit your Doctor if:
- You have any type of heart condition.
- You have high blood pressure, or if you don't know if your blood pressure is normal.
- You experience extreme breathlessness after mild exertion.
- You have bone or joint problems.
- You often feel faint or have spells of severe dizziness.
- You have a medical condition that might need special attention.
- You are over 35 and have not exercised regularly.

If you are a beginner or haven't done much regular exercise, start slowly and gradually increase your intensity level. Go at your own pace and comfort level. NEVER ignore pain during exercise. If an exercise causes you pain, try a modification or simply don't do it.

Do not leave the group fitness class if you experience discomfort, dizziness, pain, or feel you need to stop. Alert the Group Fitness Instructor for assistance.
