Calculations for Measures

MEASURE	DESCRIPTION AND HOW IT WAS CALCULATED
Graduation Rate	The graduation rate is calculated by the Office of Institutional Research based on a 6-year graduation rate for undergraduate programs and a 3-year graduation rate for Master’s programs. The graduation rate (percent) is based on a comparison of the number (N) of students who entered a college or university and the number of those who graduated within six (three for Master’s) years. The results indicated are for headcount starting in Fall 2019 for undergraduate students and Fall 2022 for Master’s.
Retention Rate	The retention rate is calculated by the Office of Institutional Research as the number of first year students returning the

	following year. The results indicated utilize Fall 2024 to Fall 2025.
-	Indicate that there was no student cohort to start with.
DBA Graduation Rate	The rate represented as the 6-year rate for the Fall 2019 new DBA student cohort who have graduated by 8/31/2025.
