Promotion and Tenure Guidelines: College of Aeronautics
Reviewed and approved by the College faculty September 27, 2018

These guidelines may be reviewed and revised by the College of Aeronautics as needed and shall be reviewed at least every 5 years.

Introduction
The College of Aeronautics (the College) faculty is comprised of highly qualified individuals from both academia and a variety of disciplines related to aviation who work in harmony to execute the College’s mission, which is: (a) to prepare students for success and advancement in the aviation professions, (b) advance aviation knowledge through faculty and student research, scholarly activity and projects, and (c) encourage and enable student and faculty service to the university, community and aviation professions.

Primary Areas
Concomitant with this mission is promotion and tenure, which are earned by faculty members’ demonstration of overall excellence in three primary areas: Teaching, Scholarship, and Service. All College faculty are expected to engage in the three interrelated areas.

• Teaching includes effective teaching and student advising.
• Scholarship includes the contribution of work to the advancement of knowledge within faculty members’ research field—which will vary given the interdisciplinary nature of the College—as well as the publications and venues in which the work is presented.
• Service includes faculty members’ participation across a wide spectrum of activities that are both internal and external to the university.

The relative weighting of these three areas shall be determined in agreement between the faculty member and the COA dean and also shown on the COA Faculty Evaluation Form and in the Statement of Expectations. Thus, final decisions for promotion and tenure may be based on different relative weightings for different faculty members.

College of Aeronautics Model of Academic Professionalism
The College’s promotion and tenure criteria are organized on the College’s Model of Academic Professionalism, which is then applied across the areas of Teaching, Scholarship, and Service. This model consists of the following six dimensions, which were adapted from Kern’s (2011) Domains of Professionalism in Aviation: (a) Excellence in the Field, (b) Professional Ethics (c) Continuous Improvement, (d) Professional Engagement (e) Professional Image and (f) Service to the Profession. The focus of each dimension is given in Table 1 while Tables 2–7 give examples of experiences related to each dimension.

</table>

Note. *Adapted from Kern’s (2011) Domains of Professionalism in Aviation.

Examples of Experience

Examples of experience for the three primary areas and across each dimension of the College’s Model of Academic Professionalism are provided in Tables 2–7. These tables are to be used as examples and not as a checklist when preparing the Statement of Expectation and the promotion dossier.

Although quantity generally is easier to measure than quality, the College recognizes that quantity is subordinate to quality. The College defines quality relative to: (a) the work’s perceived reputation within the faculty member’s research field, which will vary given the interdisciplinary nature of the College; (b) the extent to which the work is used to establish relationships within a faculty member’s discipline; (c) the scope of the work from a practitioner perspective; and (d) the work’s novelty.

Statement of Expectation

Recognizing that contribution to the advancement of knowledge, quality, and effort vary widely with different experiences, the College does not prescribe a specific quantity of work for promotion and tenure. Rather, College faculty who petition for promotion and tenure are expected to include their Statement of Expectation, agreed to between the faculty member and
the College dean. The statement will include, in part, the weighting of the areas and what specific experiences are expected to be completed so that the faculty member’s overall experiences reflect the level of accomplishment appropriate for the rank being sought. For faculty hired before implementation of tenure, the current and previous Faculty Workload Forms will serve as the initial draft of the statement of expectations.

**Promotion to Associate Professor with Tenure**
Faculty members considering promotion to Associate Professor with Tenure must meet the minimum qualifications for the rank, and must have a documented record of experience in each of the required primary areas that builds on their accomplishments since their last promotion in rank and shows that they have met the expectations in their Statement of Expectation.

**Minimum Qualifications**
- A minimum of 5 years in rank as Assistant Professor or equivalent
- A doctoral degree
- A Statement of Expectation or similar alternative agreement defining specific criteria for promotion and tenure

**Promotion to Professor with Tenure**
Faculty members considering promotion to Full Professor with Tenure must meet the minimum qualifications for the rank, and must have a documented record of experience in each of the required primary areas that builds on their accomplishments since their last promotion in rank and shows that they have met the expectations in their Statement of Expectation.

**Minimum Qualifications**
- A minimum of 5 years in rank as Associate Professor or equivalent
- A doctoral degree
- A Statement of Expectation or similar alternative agreement defining specific criteria for promotion and tenure

| Tenured Associate Professor | • Uses end-of-course student evaluations to guide changes to instructional/assessment strategies.  
• Uses peer or supervisor classroom observations to guide changes to instructional/assessment strategies.  
• Maintains scheduled advisement/office hours.  
• Serves as an academic advisor (undergraduate/graduate).  
• Teaches international courses.  
• Develops instructional/assessment materials related to course or program modification.  
• Member of Graduate Faculty at master’s level.  
• Prepares/submits education-based grants or gifts directly related to instruction.  
• Recipient of recognition/awards for teaching or advising effectiveness.  
• Industry recognition of teaching efforts.  
• Other ______________________________________ |
| Tenured Full Professor | • Applies research-based best practices to instruction.  
• Publishes research in refereed journals (print/electronic).  
• Presents papers/posters at professional conferences.  
• Serves as a reviewer for a journal or government agency.  
• Serves as a reviewer for conference proceedings.  
• Member of discussion panels at local, state, national conferences.  
• Engages in unfunded research such as:  
  – Nonthesis/nondissertation research projects  
  – University/College supported research projects  
  – Thesis/dissertation committee chair (major advisor)  
• Engages in externally funded research such as:  
  – Sponsored research grants/contracts from public organizations such as NSF, FAA, NOAA, and others.  
  – Grants/contracts from private organizations and/or foundations  
  – Paid consulting projects  
  – Preparation/administration of sponsored research grants  
  – Funding proposals submitted but not funded (rejected)  
• Other ______________________________________ |
|                       | • Participates on College- and/or University-wide committees.  
• Member of thesis/dissertation committees (COA non-chair or as outside member).  
• Performs administrative duties assigned by Dean.  
• Participates in local, state, or national professional meetings, panels, or workshops.  
• Recipient of local, state, or national awards/recognition.  
• Participates in student enrichment/outreach activities.  
• Serves as an advisor to student organizations.  
• Participates in co-curricular activities.  
• Member of professional societies.  
• Other ______________________________________ |

|                       | • Author of book reviews, essays, op/ed pieces published in refereed journals.  
• Author of book chapters, book supplements, monographs.  
• Author of books or textbooks.  
• Editor of journals or conference proceedings.  
• Editor of textbooks.  
• Member of discussion panels at international conferences.  
• Member of editorial boards.  
• Invited keynote presenter at professional conferences.  
• Recipient of research-based awards, prizes, recognitions.  
• Recipient of intellectual properties such as software and patents.  
• International research collaborations.  
• Other ______________________________________ |

|                       | • Participates in student enrichment and outreach activities such as student diversity/inclusion programs.  
• Participates in local outreach to underrepresented or underserved communities.  
• Recipient of international awards/recognition.  
• Participates in international collaborations or outreach.  
• Participates in international professional meetings, panels, or workshops.  
• Participates on external boards, commissions, or advisory committees.  
• Participates as an expert witness.  
• Industry recognition of service efforts.  
• Other ______________________________________ |
