# OFFICE OF THE PRESIDENT

To our graduates and newest alumni:

Congratulations from your Florida Tech family! We are immensely proud of your accomplishments. Today is a milestone moment, something to enjoy and to celebrate. You have worked hard and succeeded in this major step forward in your life.

I hope you feel grateful and proud of what you have just accomplished. Look back over your time at Florida Tech and savor those memories. A walk through the botanical garden. A good grade in that notoriously difficult class. An amazing international meal at PDH. Those are key parts of your time here, and Florida Tech is proud to do them better than most, as *The Wall Street Journal* noted when it ranked us 6th in the nation earlier this year for our student experience.

So these memories and experiences are part of who you are now, but they are not ALL that you are. There is so much more to come.

It is now time to face your next challenge, with all that entails. Excitement, anticipation, maybe a little anxiety. But it's worth it! Remember, you don't have to be great to start, the motivational speaker Zig Ziglar reminded us, but you have to start to be great.

And thankfully, that Florida Tech diploma you have earned brings with it benefits beyond the skills you acquired and lessons you learned while in class. It brings recognition that a Florida Tech graduate is truly special. That's not an opinion: the influential Global Employability University Ranking and Survey, filled out by thousands of top international employers, ranked Florida Tech 17th among U.S. schools on the strength of our graduates.

This ranking found that Panthers excel in key employability drivers like academic excellence, graduate skills, hands-on experiences and comfort in international environments.

So as you enter the workforce or military or consider additional degrees, remember: You got this. And know that your relationship with the university does not end today. Panthers support one another, in any way possible, and I hope that you will continue to engage with your alma mater.

You already made one key decision in opting to come to Florida Tech. Now take us with you, in your heart and in your head, as you move forward, embracing your time, living your opportunities. We are all so proud of you.

#Panther4Life!

Sincerely,  
John Nicklow, Ph.D.  
President

# BOARD OF TRUSTEES

**Rita Hartung Cheng, Ph.D.**

President Emerita, Northern Arizona University

**Dale A. Dettmer '71, J.D.**

Attorney at Law, Whitebird Law

**Kirsten L. Dreggors**

*Vice Chairman, Florida Institute of Technology Board of Trustees*, Vice President of Engineering, Aeronautics Systems, Northrop Grumman

**Bobbie Dyer**

Division President, Dyer Mortgage Group

**Jill A. Eanes '91, '93**

Captain, United Airlines

**William J. Guyan**

President (Ret.), Pruitt McCaslin Inc.

# COMMENCEMENT SPEAKER

Joan Higginbotham is an electrical engineer, rocket scientist, retired astronaut, successful corporate leader and Florida Tech alumna who holds two graduate degrees from the university: a Master of Science in Management and a Master of Science in Space Systems. Her career spans the government, public and private sectors, including NASA and several Fortune 500 companies in the aerospace, energy and retail industries.

Higginbotham's career at NASA began in 1987, when she worked as payload electrical engineer in the electrical and telecommunications systems division at Kennedy Space Center. Within six months she became lead for the orbiter experiments on Space Shuttle Columbia. She later worked on payload bay reconfiguration for all shuttle missions and conducted electrical compatibility tests for all payloads. After additional duties and roles, Higginbotham was promoted to lead orbiter project engineer for Space Shuttle Columbia. In this position, she held the technical lead government engineering position in the firing room where she supported and managed the integration of vehicle testing and troubleshooting. Overall, she actively participated in 53 space shuttle launches during her 9-year tenure at KSC.

Higginbotham was selected as an astronaut candidate in 1996, where she conducted a series of critical technical duties across multiple operations, including Payloads & Habitability Branch, the Shuttle Avionics & Integration Laboratory, the Kennedy Space Center Operations Support Branch, and the Astronaut Office CAPCOM (Capsule Communicator) Branch. In December 2006, she launched on Shuttle Discovery as a member of STS-116, becoming the third African American woman to go into space. The nearly 13-day mission continued construction of the International Space Station. Higginbotham's primary task was to operate the Space Station Remote Manipulator System, known more simply as the robotic arm.

In November 2007, Higginbotham retired after a 20-year distinguished career with NASA to pursue work in the private sector. What followed were high-profile roles at some of the nation's leading companies, including Marathon Oil, Lowe's Companies Inc., UTC Aerospace Systems and Collins Aerospace. In April 2022, she launched Joan Higginbotham Ad Astra, an aerospace consulting firm.

Higginbotham has been recognized throughout her career, earning such honors as the NASA Exceptional Service Medal, an induction into the National Association of Negro Business and Professional Women's History Hall of Fame, being named one of *Savoy Magazine's* Top Influential Women in Corporate America, and recognition by President George W. Bush at the 81st White House Black History Month celebration. Fittingly, Higginbotham appears in singer Alicia Keys's "Superwoman" music video.

Higginbotham holds an Honorary Doctorate in Aerospace Science from Southern Illinois University at Carbondale, her undergraduate alma mater, as well as an Honorary Doctorate in Humanities from the University of New Orleans. Higginbotham resides in Charlotte, North Carolina, and is married to the Honorable James E. Mitchell Jr.

# HISTORY

**F**ounded in 1958 as Brevard Engineering College by Jerome P. Keuper, Florida Tech initially offered continuing education opportunities to scientists, engineers and technicians working at what is now NASA's John F. Kennedy Space Center. The new college grew quickly, paralleling the rapid development of America's space program. The college, dubbed by the media as the "night school for missilemen," gained international attention, including a visit from legendary rocket scientist Wernher von Braun.

From the beginning, Florida Tech has been committed to excellence in graduate education. A 1962 article in *The New York Times* described Brevard Engineering College as "the only space engineering college in the country ... its graduate course offers engineers the opportunity to obtain a master's degree and keep up with the advancement taking place daily at the Cape."

At the time of the article, all of the college's graduate students worked on America's race to space during the day and attended classes at night. Today, as the university has evolved, nearly 60% of on-campus graduate students attend and do research full time.

The university moved to its current Melbourne campus in 1961, and construction began immediately on administration and classroom buildings to augment existing buildings on the site. Before the decade's end, the university would break ground on its first million-dollar building, the Crawford Building.

In 1966, the college changed its name to Florida Institute of Technology to acknowledge its growing identity as a scientific and technological university, the only such independent institution in the Southeast.

During the 1990s, the university added new facilities valued at nearly \$50 million with construction of the F.W. Olin engineering, life sciences and physical sciences buildings and the Charles and Ruth Clemente Center for Sports and Recreation. The next wave of modernization included \$75 million in new infrastructure, including the Emil Buehler Center for Aviation Training and Research, Ruth Funk Center, The Scott Center for Autism Treatment, L3Harris Center for Science and Engineering, Panther Dining Hall, Panther Aquatic Center, L3Harris Commons, Varsity Training Center, L3Harris Student Design Center and a parking structure.

Florida Tech campus facilities continue to evolve to meet 21st-century needs. In 2020, the Folliard Alumni Center opened on the site of the old Alumni House. The sleek new building is both aesthetically pleasing and energy-efficient, with eco-friendly features at the core of its design and goals. In 2022, the 61,000-square-foot Gordon L. Nelson Health Sciences building opened, enhancing the university's capacity for undergraduate and graduate education, scientific research and social engagement with state-of-the-art teaching laboratories in human anatomy, augmented and virtual reality teaching tools, and facilities for orthopedics, tissue studies and advanced computational simulations. The Mertens Marine Center also opened in 2022, providing a premier, hands-on educational experience for students studying marine biology and water quality.

More than 70,000 degrees have been conferred on students at Florida Tech since 1958, when 154 students signed up for the first fall semester. As the institution advances and the alumni ranks multiply, the university remains dedicated to developing concerned scientists, aviators, engineers and business leaders who will change the world.

## Florida's Flags

**O**n stage are flags that have flown over Florida skies. They represent the Spanish monarchy (16th century), the French monarchy (16th century), the United Kingdom (18th century) and the current State of Florida. These and the other flags constitute Florida Tech's way of expressing and symbolizing 400 years of Florida's history from the era of the European voyages of discovery to the present including over 200 years since the birth of our nation.

# ACADEMIC ORGANIZATION

The university is organized into four academic units: College of Aeronautics, Nathan M. Bisk College of Business, College of Engineering and Science and College of Psychology and Liberal Arts.

## College of Aeronautics

The College of Aeronautics offers Bachelor of Science degrees in aeronautical science, aviation administration, aviation human factors & safety, aviation management and aviation meteorology, each with flight and nonflight options. The college also offers a Bachelor of Arts in aviation management; associate degrees in aeronautical science with flight, air traffic control, aviation management with and without flight, aviation meteorology with flight, and flight operations and dispatch; master's degrees in airport development and management, applied aviation safety, aviation human factors, aviation management, aviation safety, and human factors in aeronautics; a Ph.D. in aviation sciences; and a Doctor of Aviation, Av.D.

## Nathan M. Bisk College of Business

The Nathan M. Bisk College of Business offers associate degrees in accounting, business administration, healthcare management, management, and marketing; bachelor's degrees in accounting, business administration, finance, and information systems; master's degrees in accounting and financial forensics, acquisition and contract management, business administration, commercial enterprise in space, healthcare management, human resources management, information technology, information technology–cybersecurity, information technology–database administration, logistics management, logistics management–humanitarian and disaster relief logistics, management, management–acquisition and contract management, management–human resources management, management–information systems, management–logistics management, management–transportation management, public administration, project management, project management–information systems, project management–operations research, quality management, supply chain management, systems management, systems management–information systems, systems management–operations research, and technology management; and a Doctor of Business Administration.

## College of Engineering and Science

The College of Engineering and Science includes seven departments: aerospace, physics and space sciences; biomedical engineering and sciences; chemistry and chemical engineering; electrical engineering and computer science; mathematics and systems engineering; mechanical and civil engineering; and ocean engineering and marine sciences. Programs include aerospace engineering, applied mathematics, astrobiology, astronomy and astrophysics, biochemistry, biological sciences, biomathematics, biomedical engineering, biomedical science (premedical), biotechnology, cell and molecular biology, chemical engineering, chemistry, civil engineering, computer engineering, computer information systems, computer science, conservation technology, construction management, ecology, education, electrical engineering, engineering management, environmental and informal science education, environmental resource management, environmental science, flight test engineering, general biology, genomics and molecular genetics, human-centered design, information assurance and cybersecurity, interdisciplinary science, marine biology, marine conservation, mathematical sciences, mathematical sciences–applied mathematics, mechanical engineering, meteorology, ocean engineering, ocean engineering, oceanography, operations research, physics, physics–premedical physics, planetary science, software engineering, space sciences, space systems, space systems management, STEM education, sustainability studies and systems engineering.

## College of Psychology and Liberal Arts

The College of Psychology and Liberal Arts includes the School of Arts and Communication, School of Behavior Analysis and School of Psychology, as well as the military science program (Army ROTC). The college offers an associate degree in applied psychology; bachelor's degrees in applied behavior analysis, applied psychology, forensic psychology, humanities, humanities–prelaw, multiplatform journalism, psychology, and strategic communication; master's degrees in applied behavior analysis, applied behavior analysis and organizational behavior, behavior analysis practice, global strategic communication, industrial/organizational psychology, organizational behavior management, and organizational leadership.

# ACADEMIC REGALIA

Academic heraldry in the form of academic dress reaches as far back as the earliest days of the oldest universities. Formal directives concerning the correct and proper wearing of academic regalia date back to the early 14th century. In the United States, as a result of our English heritage, caps and gowns have been used since colonial times.

As heraldic devices such as shields, coats of arms, standards, etc., could identify a knight and his individual heritage, academic costume can describe the academic origin and accomplishments of the wearer. Easily recognizable are holders of bachelor's, master's and doctoral degrees. With the same glance, the trained eye may identify the university that conferred the degree as well as the individual's field of learning.

The shape and decorations of the gown are the keys to the highest degree earned by an individual. The undergraduate's gown has long pointed sleeves and is worn closed. The master's gown has an oblong sleeve, open at the wrist; the rear part of its oblong shape is square cut and the front part has an arc cut away. The master's gown may be worn open or closed. The doctoral gown has bell-shaped sleeves, may be worn open or closed, and may be most readily identified by its velvet facing down the front and by three velvet bars on each sleeve.

There is no general rule for the position of the tassel on a mortarboard. During commencement exercises at Florida Tech, undergraduate candidates for degrees are requested to wear the tassels on the right side before degrees are conferred and then to shift them to the left. The tassels worn by graduates at Florida Tech reflect the level of degree awarded, as follows:  
Black.....Undergraduate degree level  
Yellow..... Master's degree level  
Gold..... Doctorate level

It is the hood, however, that is the most important and distinctive feature of American academic pageantry. It enables anyone attending an academic function to distinguish at a glance the wearer's academic heritage. The bachelor's hood, seldom seen in American academic circles, is three feet long, with a two-inch edging of velvet. The master's hood is three feet long, with a three-inch edging. The doctoral hood is four feet long, with a five-inch edging.

The color of the hood's velvet edging represents the field in which the wearer earned his degree. Although black may be used for any area, specific colors denoting the various field of learning are assigned. There are more than two dozen hood colors accepted at colleges and universities in the United States, some of which may be worn today by faculty and administrators who have graduated from other universities here or abroad. However, Florida Tech degree candidates wear one of the following colors:  
Gold.....Science and Engineering  
Drab..... Business  
Light Blue..... Education  
Royal Blue.....Psychology

The hoods of American colleges and universities are lined with silk in the official academic colors of the institution that conferred the degrees. Florida Tech graduates, for example, will wear hood linings that are crimson (red) with a gray chevron (stripe).

Undergraduates graduating with honor may wear cords designating the honor.

White..... cum laude  
Silver..... magna cum laude  
Gold..... summa cum laude

The academic regalia you see before you today can be traced directly to the beginnings of the oldest colleges and universities. In 1885, there occurred a widespread student movement in America to wear caps and gowns at commencement ceremonies. The graduating students seemed to feel a need for significant and dignified apparel for the occasion. By 1895, widespread adoption of a uniform code by 95 percent of colleges and universities in this country gave America its own distinct academic regalia.

However, at any academic gathering, costumes usually appear that cannot be fathomed by these guidelines. Some of these may be from foreign universities, others from those American institutions that have preferred to remain with the European tradition of allowing each school to determine its own costume. The net result is the academic costume you see before you today.

Office of Alumni Affairs

May 2024

Dear Florida Tech Graduate,

Congratulations on earning your degree! The 70,000+ alumni of the Florida Institute of Technology family and our board of directors are pleased to welcome you into the select group of individuals who have graduated from Florida Tech. Further, we welcome you into the Florida Tech Alumni Association.

You have only one requirement to participate in the many benefits and programs of the alumni association—keep the Office of Alumni Affairs informed of your current mail and email addresses, so we can keep in touch with you (and make sure you sign up on our new outreach platform, Florida Tech Connect at [floridatechconnect.com](http://floridatechconnect.com))!

Upon graduation, you are automatically a member of the alumni association and have access to many benefits and services. Our online community provides instant access to our complete alumni directory, job opportunities, exclusive alumni events and more. The Florida Tech alumni page on Facebook provides you with an additional online resource for keeping in touch with other alumni and lets you know about upcoming events such as homecoming. You are cordially invited as a new alumnus to this yearly event, and it is our sincere wish that you revisit often.

We hope you will join us in our proud tradition of supporting the association and your alma mater. As graduates, we are strongly committed to continuing the development of Florida Tech as a world-class university. Our priorities include recruiting qualified students, addressing the issues that are important to encourage student retention, raising funds for scholarships and endowments, and improving the career network of graduates in order to help them meet their career objectives. In the recent past, the association successfully spearheaded the effort to build a new alumni house, the Folliard Alumni Center, which will forever serve as your base camp for revisiting our beautiful campus. In the future, there will be other outstanding efforts by the association to visibly grow the student experience at Florida Tech. We hope you will take advantage of these great benefits available to you and that you will support our efforts to promote your alma mater.

Again, on behalf of the Florida Tech Alumni Association, I say congratulations to you, the members of the Class of 2024. Best wishes for great success in all your future endeavors!

Go Panthers!

*This list of candidates for graduation was prepared before final grades were reported and inclusion herein does not constitute evidence of graduation. While every effort is made for clearance prior to the printing deadline, final action to ensure an accurate listing of the names of all persons qualified for degrees cannot always be taken before the program goes to print. Therefore, errors are possible, and the listing of a name in this program should not be constituted as an indication that the person will in fact receive a degree from Florida Tech at this commencement. Conversely, the absence of a student's name from this list does not necessarily mean that the person will not be awarded a degree.*

## THE STAR-SPANGLED BANNER

*Oh, say can you see, by the dawn's early light  
What so proudly we hailed at the twilight's last gleaming  
Whose broad stripes and bright stars, through the perilous fight  
O'er the ramparts we watched, were so gallantly streaming  
And the rockets' red glare, the bombs bursting in air  
Gave proof through the night that our flag was still there  
Oh, say does that star-spangled banner yet wave  
O'er the land of the free and the home of the brave*

*Francis Scott Key (1779–1843)*

## FLORIDA TECH ALL HAIL! (ALMA MATER)

*Nestled deep within the garden  
'Neath the skies of blue  
Stands our noble alma mater  
Wonderful to view*

### CHORUS

*Lift the chorus, lift it skyward  
Sound it to the shore  
Florida Tech, our alma mater  
To the clouds we soar  
  
We, together in ambition,  
Homelands near and far  
Join our hands in love of learning  
Reaching for the stars*

### CHORUS

*Sign of hope and inspiration  
Lead to never fail  
Ever is our alma mater  
Florida Tech all hail!*

### CHORUS

*Lyrics by Mary and Ken Droscher, 2001  
Music by H.S. Thompson, "Annie Lisle," 1860*
